Contact : +91 7603992425

Location :Salem, Tamil Nadu.

Suganthi.P, who has worked as a Frontend developer in the IT industry for a total of two years, has applied for this position.

### **Professional Summary :**

- Frontend Developer with 2 years of experience specializing in MERN stack (MongoDB, Express.js, React.js, Node.js). Skilled in building scalable, responsive web applications and reusable UI components using Material UI, Bootstrap, SASS, and global CSS. Strong expertise in developing and integrating RESTful APIs, optimizing database queries, and implementing MVC-based architectures. Experienced in cross-functional collaboration, third-party API integration, and end-to-end application development. Focused on improving performance, scalability, and user experience using modern development best practices.

### **Technical Skills :**

- **Frontend** : HTML5, JavaScript (ES6+), TypeScript, React.js
- **UI Libraries & Styling** : Material UI, shadcn/UI, Bootstrap, Tailwind CSS, SASS
- **Backend** : Node.js, Express.js
- **Frameworks** : Next.js
- **Database** : MongoDB
- **Version Control** : Git, GitHub
- **Tools & Platforms** : Visual Studio Code, Postman

### **Professional Experience :**

Fullstack Engineer Inten - Cyberdude Networks pvt ltd (Present)

Web developer Intern - Brihas AI (Aug 2025 - Nov 2025)

Web developer - Techhyve Connect Pvt Ltd (Nov 2024 - Jan2025)

Software Engineer - Decision Minds Pvt Ltd (Sep 2021- May 2023)

### **Full Stack Engineer Intern – CyberDude Networks Pvt Ltd (*Present*)**

- Currently working on an E-Learning website, focusing on responsive layouts, UI structure, and clean styling using HTML and CSS.

## **Web Developer Intern – Brihas AI (Aug 2025 – Nov 2025)**

- Built server-rendered, static, and dynamic web applications using Next.js.
- Implemented Client-Side Rendering (CSR), Server-Side Rendering (SSR), and Static Site Generation (SSG) for better performance and SEO.
- Used Next.js routing (App Router / Pages Router) for navigation and dynamic routes.
- Developed dynamic pages and integrated RESTful APIs for data fetching using fetch/axios and Next.js API routes.
- Integrated Gemini API to implement an AI-powered chat section, enabling dynamic and interactive user experiences.
- Applied Image Optimization and Static Asset Serving with next/Image.
- Enhanced performance using lazy loading, dynamic imports, and prefetching.
- Designed and refined UI/UX with Figma, providing design updates, suggestions, and prototypes to improve usability.
- Ensured responsive design and accessibility using Tailwind CSS / styled-components.

## **Web Developer - Techhyve Connect Pvt Ltd (Nov 2024 – Jan 2025)**

- Design, develop, test, and maintain scalable, responsive, and user-centric full-stack web applications using React.js, Node.js, Express.js, and SQL.
- Collaborate with UI/UX designers, backend engineers, and cross-functional teams to deliver high-quality features and seamless functionality.
- Build modern, reusable, and responsive front-end components using Material UI, Bootstrap, SASS, and globalized CSS methodologies, ensuring consistent design across devices and browsers.
- Implement backend services, RESTful APIs, and database interactions using Node.js, Express.js, and SQL, following the MVC architecture for a clean and maintainable code structure.
- Integrate third-party APIs and perform CRUD operations to support dynamic data-driven features.
- Write and maintain clean, efficient, and well-documented code across frontend and backend, adhering to coding standards and best practices.
- Stay current with emerging web technologies, frameworks, and tools to continuously improve development quality and efficiency.
- Deliver projects on time while meeting or exceeding quality benchmarks, contributing to a strong sprint completion rate.
- Developed and maintained responsive websites ensuring optimal performance, usability, and consistent design across desktops, tablets, and mobile devices.

**Software Engineer – Decision Minds Pvt Ltd (Sep 2021 – May 2023)**

- Developed reusable and scalable React.js components to improve development speed, maintainability, and UI consistency.
- Built responsive, user-friendly interfaces for data profiling, reconciliation, and other workflows involved in database migration to Snowflake.
- Integrated backend APIs to enable real-time data operations and enhance end-to-end user experience.
- Improved user workflows and navigation for better data management and platform usability across devices.
- Developed RESTful APIs using Node.js, Express.js, and MySQL to support seamless front-end–back-end communication.
- Created and virtualized data using React.js, HTML, and SCSS for an efficient and intuitive UI experience.
- Built a project management module within an LMS to streamline workflows and boost productivity.
- Collaborated with clients and backend teams, conducting requirement analysis to align technical solutions with business needs.

**Education :**

Bachelor of Engineering 2016 -2020  
Gnanamani College of Technology

**Declaration :**

I hereby declare that the details mentioned above are true to the best of my knowledge.
